

CATEGORY	ECM TECHNOLOGY
Metering & Controls	- Automatic metering system
	- Voltage optimisation
	- Building Management System (BMS)/controls upgrade
Lighting	- Lighting control
	- Low energy lighting
Small Power	- Small power management controls
	- Low energy appliances and equipment
HVAC (Heating, Ventilation and Air Conditioning)	- Boiler upgrade
	- Variable speed drives for fans and pumps
	- Air handling unit heat recovery
	- Chiller upgrade
	- Domestic hot water services point of use generation
Miscellaneous	- Vertical transportation control and management
	- High efficiency measures on hydraulic lifts
Fabric	- Infiltration measures (Air-tightness improvements)
	- Replacement glazing
	- Roof insulation upgrade
	- Wall insulation – over-cladding
CHP (Combined Heat & Power)	- Combined heat and power
Low and zero carbon technologies	- Biomass boilers
	- Photovoltaic cells (PVs)
	- Medium scale wind
	- Ground Source Heat Pumps (GHP)
	- Biomass CHP

***This list is not necessarily exhaustive. If you are in any doubt as to whether your project's technology is suitable, please get in touch: alex.gilbert@amberinfrastructure.com**
